Default time zone

UPDATE NOTIFICATIONS

☒ Check for updates automatically

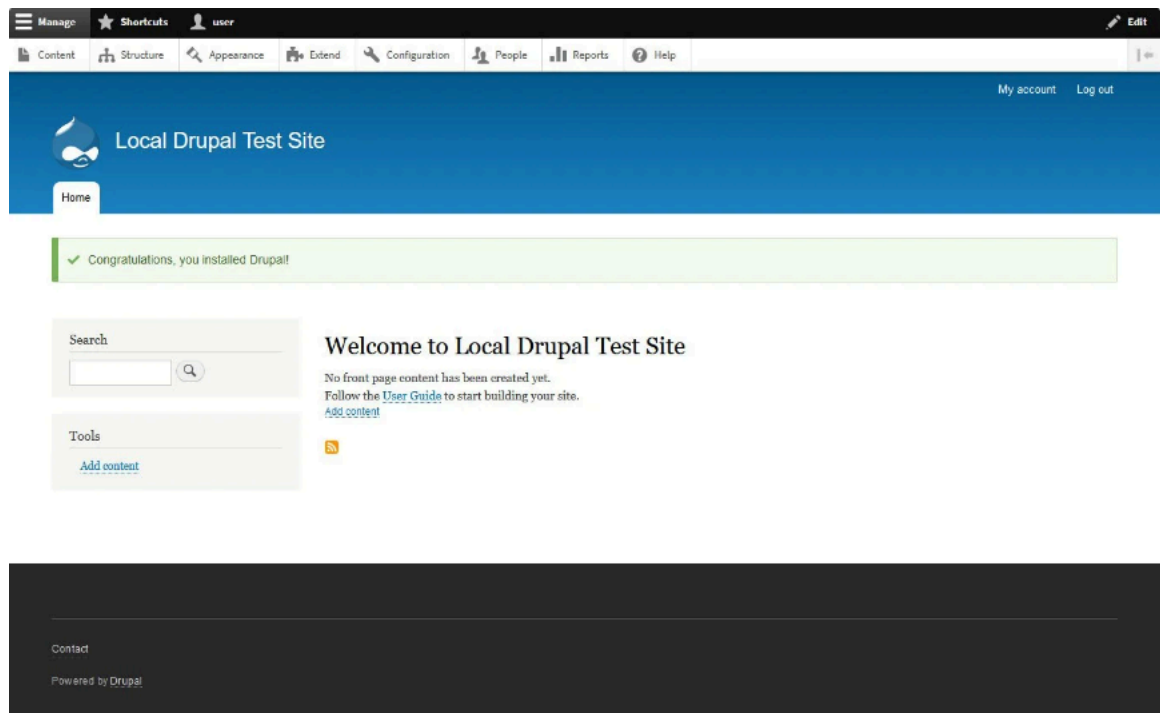

☒ Receive email notifications

When checking for updates, anonymous information about your site is sent to [Drupal.org](https://www.drupal.org).

Save and continue

Here's how to fill it in.

- Site name — The name of your website. You can change this later on, so don't get too hung up on getting it right.
- Site email address — The email address from which users will receive site notifications.
- Username — The user name of your sites' main admin account.
- Password — Select a strong password to keep your account safe and don't forget to confirm it once more.
- Email address — The email address associated with your main user. Drupal will automatically fill in the site email address, change it as needed.
- Default country — The default country for your site.
- Default time zone — The time zone your site will use for displaying dates and similar information.

When logged in (you can always get to the login screen via <http://yourdomain.com/user/login>), at the top of the screen, you see links to all parts of the back end where you can make changes to your site. We will use a bunch of them in the course of this Drupal tutorial, but for understanding's sake, let's quickly highlight what each of them contains:

- Content — Here, you can create basic content like posts and pages. It is also where you take care of comments and find your site's media library.
- Structure — This is where you manage all structural elements of your site including blocks, forms, content types, menus, and taxonomies.
- Appearance — It contains the settings for themes and other appearance-related options as well as site updates.
- Extend — Under this menu, you can install, update, and uninstall Drupal modules.
- Configuration — Gives you access to your site settings.
- People — Contains options for users, roles, and permission levels.
- Reports — Here, you find logs, update information, status reports, errors, search phrases, and other information about your site.
- Help — The central hub for helpful information about basic site administration as well as any modules installed on your site.

Welcome

Welcome to the Waterfall Handbook! It's our mission to explore every waterfall. High quality images, hiking reviews and vibrant community is a cornerstone of our work.

Why Join?

If you love to hike and would like to share in this experience not only with your own family, but also with a group of fellow waterfall enthusiasts, you may be wise to consider joining this site.

Experiencing a waterfall can be awe-inspiring. We share photos & videos of waterfalls, hiking and preparation tips and more. Occasionally we organize group trips to waterfall hikes. Often, this results in everyone having a much better time because there are plenty of others to share in the adventure.

South Island

Purakaunui Falls

Purakaunui Falls, the most photographed New Zealand waterfall, is located in the heart of the Catlins Forest Park. Easy walk to the waterfall's lookout and unique beauty make this falls one of the best places to visit with your family, and it's included into New Zealand Must See Waterfalls list.

Trident Creek Falls

Probably the most beautiful and exquisite waterfall in Glacier's land, Trident Creek Falls is located alongside a rocky walk-path to Franz Josef Glacier. Reached by an unbelievable 30 minutes' walk, this waterfall is one of New Zealand Must See Waterfalls.

Home

Huka Falls

11m high, extremely powerful, turquoise-color, Huka Falls is located on the Waikato River, just in 10 minutes' drive from Taupo. The waterfall is one of the most visited natural attractions in New Zealand, probably due to the water flow of 300,000 liters per second (79,252 gallons per second).

Dawson Falls

Waterfall location: [North Island](#)
Waterfall height : 18 meters
Hike duration: 20 minutes
Hike difficulty: [Easy](#)

Dawson Falls, also known as Te Rere o Nōke, is an 18-meter waterfall, the most popular one at Mt Egmont National Park due to an easy accessibility and its beauty.

The centerpiece of Egmont National Park is Mount Tarnaki.

The funny thing about this classically-shaped volcano was that it actually doubled as the iconic Japanese volcano Mt Fuji in the Tom Cruise movie The Last Samurai.

Huka Falls

Waterfall location: [North Island](#)
